

HackHive 2025 Scoring Sheet

Option 1: AI Solution Design & Strategy

Criteria	Points	Description	Judge Score	Comments
Problem Statement: Clarity & Relevance	10	Must include a thorough analysis of the problem, target audience, and real-world implications.		
AI Integration: Alignment & Effectiveness	25	Must demonstrate a deep understanding of AI techniques, why they're chosen, and how they solve the problem strategically		
Impact & Relevance to Chosen Challenge	20	Needs a detailed plan for real-world scalability, potential societal impact, and ethical considerations .		
Complexity of System Design	15	High complexity expected: Detailed diagrams, comprehensive user flows, and a clear plan for AI integration in the system.		
Ethical Considerations & Fairness	10	Must deeply address bias, fairness, and transparency in the AI system design.		
Innovation: Creativity & Originality	10	Highly innovative design expected: New methodologies, unique AI applications, or creative system architecture.		

Presentation Quality: The Pitch	10	Clear explanation of design rationale, potential challenges, and scalability. Must answer tough questions on feasibility.
