

HackHive 2025 Scoring Sheet

Option 2: Platform Development Challenge

Criteria	Points	Description	Judge Score	Comments
Problem Definition & Relevance	10	Is the problem clearly defined in the README and demo? Does it align with the chosen challenge? Why is AI the right tool to solve this problem?		
Depth of AI Integration & Effectiveness	20	Is AI meaningfully integrated into the platform? Does it go beyond simple API calls? Is the AI customized or tailored to the problem?		
Functionality & Usability of the Platform	20	Does the platform work smoothly? Is the user experience intuitive? Does the AI feature function as expected, and is it well-integrated with the platform?		
Code Quality & Organization	10	Is the code clean, well-structured, and readable ? Are best practices followed (e.g., proper naming conventions, modular code, comments)? Is the GitHub repository well-organized with a clear README ?		
Ethical Considerations & Data Handling	10	Has the team addressed data privacy, bias, and fairness in their AI model? Are there safeguards in place to ensure ethical use of AI?		
Scalability & Real-World Applicability	15	Can the platform scale to handle more users or data? Have the developers considered real-world challenges for deploying this platform?		

Innovation & Technical Creativity	10	Is there a unique or creative use of AI ? Did the team attempt technically challenging features or novel approaches to solving the problem?		
Presentation Quality in Demo Video	5	Is the demo clear and engaging? Does it effectively show how AI is powering the platform? Was the solution explained concisely and professionally?		

Total Score: /100
